

Hello New Hire!

In order to help us out with maintaining our security posture, we plan on implementing a new host-based firewall solution onto our Windows 10 machines.

Please do thorough research on the following solutions:

- Microsoft Defender Firewall
- TinyWall
- GlassWire
- simplewall

For your report, I would like for you to give a comprehensive review for each of the four solutions above. Then, write a proposal to advise us on the best solution, along with a plan to implement it. Feel free to give other suggestions as well if you come across a solution that you find more fitting.

I look forward to your initial contribution to our stellar company.

Thank you,
Ursa Major
