

Business Injects

Deliverables:

1. Your inject responses for the two given during the week 2 meeting. If you missed the meeting or haven't otherwise done them, here they are (no need to submit to links in slides):

It's 4:30 AM, and you got pinged...

Scenario	Objective
<ul style="list-style-type: none">• You are a part of the insanely talented AI security team• Athena's database was poorly secured and a threat actor gained access to it• They changed the database contents, poisoning Athena• Athena is now saying not-so-kind things that could lead to negative outcomes	<ul style="list-style-type: none">• 1 page report• 30 minutes• Technical report on what caused this for your manager who is rushing into the office

34

8:30am... your CEO is awake and angry

Scenario	
<ul style="list-style-type: none">• CEO wakes to "ATHENA DOWN!" and stoppage of business• "Why should you keep your jobs if you can't prevent this?!"	
Objectives	
<ul style="list-style-type: none">• 1 page report to The CEO• 30 minutes• Explain and justify why the team should not be replaced	

Submit: <https://jessh.zip/week2-inject2>

33

Remember the important aspects of a good inject response: Good formatting, professional language, answer all parts of the inject, provide evidence (sources, screenshots, graphics)

2. ANOTHER INJECT (You do not need to prove that you did Remote Desktop Protocol for this inject):

Salutations lowly IT worker,

Because the security department is scrambling around like panicked ants over the fallen goddess, Athena, I need to ensure they are performing their duties with the utmost propriety.

I need to access this headless chicken of a "racked server without an interface" to observe the progress of these hysterical meerkats. The address of the device is 192.168.1.2. The Google interweb has informed me of this "Remote Desktop Protocol" method. What does that do, and how do I do it?

I asked your coworker to get me access to another "racked server without an interface". However, that bleating sheep was quite rude and told me to "SSH". Obviously, I don't like being shushed, and they have since faced the consequences for insulting a superior. Recently, I've been rethinking that decision. What is your coworker talking about?

Respond to me soon or the rest of your numbered days will be lived in fear and no overtime pay.

Thank me,
Athena Johnson
Your CEO

PLEASE SAVE ALL RESPONSES IN SEPARATE PDFs, ZIP THEM, NAME THE ZIP FILE "firstinitialLastname-hw2ccdc.zip", AND SUBMIT THE ZIP FILE.
