

CCDC Week 4 Homework

Linux Week

SadServers

Link: <https://sadservers.com/scenarios>

Screenshot proof of completion **and documentation** of how you completed each level. You must complete all 3 challenges below:

[Easy #3: The Command Line Murders](#)

[Easy #1: "Saint John": what is writing to this log file?](#)

[Medium #20: "Tokyo": Can't serve web file](#)

Lab Time!!

1. Connect to the VPN and clone the CCDC_Linux template on [Kamino](#).
2. There is one Linux VM: CCDCLinuxWeek
 - a. Creds: **user:bruh** and **root:bruh**
3. Use sed to create a users.txt file that contains the names of the local user accounts (not the system accounts). **Show the command used and the contents of the file.**
4. Using the users.txt file, create a bash script that changes the password of the users. **Show the script.**

Deliverables

1. A screenshot and documentation showing completion of **all 3** SadServer challenges provided
2. The command used to create the users.txt file, the file contents, and the bash script.
